

D02 - BLADE GENERAL ARRANGEMENT (v03)

Source: openfan_blade_v03_G1_PRIME_VERIFIED.SLDPRT (authoritative aerodynamic master)

Coordinate system: +X radial, +Y tangential, +Z axial (rotor axis)

Root radius $r = 0.560$ m Tip radius $r = 1.724$ m (measured, gate G1P_05)

Sweep model: radius-preserving cylindrical, $d\theta/dr = \tan(\Lambda)/r$

Realized sweep matches ED-015 design to 0.319 deg max (gate G1P_06a)

Root-to-tip axial rake: 6.1 mm (gate G1P_03; historical v02 defect: 757 mm)

Evidence: BLADE_V03_BUILD_REPORT.md, blade_v03_G1_PRIME_verification.json

STATUS: Geometrically verified (gate G1', 12/12 PASS). Aerodynamic performance NOT

CFD-validated. This is not a manufacturing blade drawing.
